Center for Computing Education Research

The ICCP (501c6) and the ICCP Education Foundation (501c3) announce the creation of the Center for Computing Education Research (CCER).

The focus of the CCER is to provide:

- a. Testing of students enrolled in 4 year undergraduate programs, following the IS2002 Model Curriculum
- b. Research in student performance for various universities and colleges
- c. Assistance for accreditation or re-accreditation of various programs if required by the state or federal agencies
- d. Research and development of the Information Systems field and emerging standards
- e. Research in emerging job skills standards and related learning objectives as they match the needs of colleges, students and employers

For more information please contact the ICCP Education Foundation through the ICCP office@iccp.org
